MANAGEMENT DISCUSSION AND ANALYSIS REPORT**ECONOMIC SCENARIO**

The problems stalking the global economy are multiple and interconnected. The rapidly cooling economy is both a cause and an effect of the debt crises and fiscal problems. India's economic growth rate this fiscal went sharply lower at 5 percent, lowest in decade on account of poor performance of manufacturing, agriculture and service sector. Rupee depreciation has been contributing to increasing inflationary pressures. Monetary and liquidity conditions have eased so far in 2012-13 after the Reserve Bank of India slashed its policy rates. The economy is expected to continue mending gradually, Indian economy is projected to grow by 5.7 percent in 2013 and 6.2 percent in next year as against world output growth of 3.3 percent and 4 percent respectively during period under review ; but with old dangers remaining and new risks emerging.

INDUSTRY SCENARIO

The Indian Pharmaceutical industry has been witnessing phenomenal growth in recent years, driven by rising consumption levels in the country and strong demand from export markets. The Indian pharmaceuticals, particularly has been the front runner in a wide range of specialties involving complex drugs manufacture, development and technology. It ranks very high in the third world, in terms of technology, quality and range of medicines manufactures.

The domestic industry's long established position as a world leader in the production of high quality generic medicines is set to reap a significant new benefits as the patents on a number of blockbuster drugs are scheduled to expire over the next few years. In addition, more and more governments worldwide are seeking to curb their soaring prescription drug costs through greater use of generics. Pharma companies will continue to benefit from recovery in the domestic market and strong growth potential in generics market in developed countries though pricing policy would have near-term impact,

OPPORTUNITIES AND THREATS

The pharmaceutical companies are increasingly under pressure due to a host of factors, including relatively dry pipeline for new drugs, higher R&D costs and increasing pressure from Governments for reduced healthcare costs. The industry is bracing itself for some fundamental changes in the market place and is looking at newer ways to drive growth. However with the right strategy, Indian companies are very well poised to take advantage of these changes and successfully navigate the future. Despite challenges, leading Indian players continue to exhibit strong profitability indicators (excluding impact of one-offs like exclusivity-related positive aberrations or impact of exchange fluctuations) and business profile. The Indian pharmaceutical companies remains favorable as we believe companies will continue to benefit from recovery in the domestic market (though pricing policy would have near-term impact), strong growth potential in generics market in developed countries and increasing geographic footprint; overall, investments in R&D and manufacturing capabilities are likely to remain buoyant over the medium term.

INTERNAL CONTROL SYSTEMS:

The Companies Internal control/supervisory system is established to ensure that board and management are able to achieve their business objectives in a prudent manner, safeguarding the interest of Companies shareholders and other stakeholders whilst minimizing the key risk such as fraud, misleading financial statements, breach of legal and contractual obligation, unauthorized business activity.

HUMAN RESOURCE:

Your Company follows a strategy of attracting and retaining the best talent and keep employees engaged, motivated and innovative. The Company continues to have cordial relations with its employees and provide personnel development opportunities for all round exposure to them.

FINANCIAL AND OPERATIONAL PERFORMANCE

Financial and Operational performance forms part of the Annual Report and is presented elsewhere in the report.

Cautionary Statement:

Some of the Statements in Management discussion and Analysis describing companies objective may be "forward looking statement" within the meaning of applicable Securities law and Regulations. Actual results may differ substantially or materially from those expressed or implied. Important factors that could influence companies operation include various global and domestic economic factors.
